

Harry J.A. Wijnhoven MSc

Veldhoven, The Netherlands

"In reality, only the result counts"

Do you dare to consider everything from a different perspective?

Harry Wijnhoven MSc provides personal- and team coaching training to CEO's, board members, (top) managers and their employees. Both on a personal and business level, in the profit and non-profit sector. Harry Wijnhoven is also an interim manager.

His strength is coaching and training people who are involved in the following areas: human resources, education, ICT, real estate, sales, production, financial, legal, marketing, business acquisitions, family business issues, change management and facility management.

He makes use of the knowledge he has gained in his University studies in Business Administration and his 34-year experience as a very successful entrepreneur.

Through paid services (e.g. Personal - / Mental coaching, mediation, training, interim work, etc.) for Shareholders / Directors / BOD / Managers / Fortune 500 people and their partners, generating profit so that we can provide for people who cannot afford it (such as poor parents, asylum children, homeless people, long unemployed people, and other unfortunate ones) free training / treatments / coaching, etc. A kind of Robin Hood principle but without the stealing part :). This gives me many happy moments in my live.

History

After his study at the Tilburg University as a business economist Harry belonged, as CEO of his own IT company and until 2004 of Paradigit Computers BV (an IT-company with 425 employees), over two decades at the top of the entrepreneurs of the Netherlands. He knows from his own experience which tensions a top position can entail. Exert a top function is in his vision just like top sport. He coaches, for example a high jumper. He does not have to teach him how to jump higher. He knows

that better than the coach. In fact, he jumps much higher than the coach. The coach can ensure that he is mentally stronger, so he can jump 1 cm higher than its competitor during the games. Nobody sees the effect of a coach. Yet the effect is present. That is the spirit he wants to give top executives. That he or she can make that extra step to be ready for the next challenge in the business world and life. Being coached and/or trained means being willing to set goals and work hard to achieve them, and be willing to get “your ass kicked” occasionally. *“In fact, you only need to manage and lead one person, and that is you.”*

Not clear about what you really want from life?

You'll know what you want when you learn how to think outside the box

Core competencies Harry Wijnhoven

1. **Experience expert:** As a master in business economics and coach/trainer and from my 26-year experience as a DGA of an IT company and managing director (until 2004) of a company with 425 employees, I know exactly what is going on, both on process- and on human level.
2. **Specialised:** In short and powerful tracks with high ROI CEO's, directors, board managers and (top) managers of coaching and training.
3. **No-nonsense/result-oriented:** My point: Wanting something without choosing is choosing not to get it. I reach operational excellence with the Coachee on both personal- and business perspective.
4. **Free style:** *It's not about the methodology, but about the final results.* I use a wide range of interventions which are tested in practice. I am provocative and make use of NLP, RET, Logo technique and PMA (a revolutionary new neuro-scientific coaching method from the U.S.) and my ‘mother wit’ (in Dutch: GBV, Gezond Boeren Verstand) training.
5. **To the point:** You ask, I deliver. You don't choose coaching as a luxury, but if it is necessary. Taking full responsibility for your own life and pro-activity leads to change. I have to make myself as a coach redundant as soon as possible.
